Body Recode

Body Recode - Consumer Marketing Strategy

Status: v1.0 - 2026-07-19. Consolidated from the locked strategy, the live funnel, and the positioning bank. **Scope:** the **consumer demand brand** - @body_recode_, bodyrecode.au marketing, and the scorecard -> Challenge -> Blueprint -> coaching/membership funnel. This is Body Recode's *consumer* face. It does **not** cover the licensing engine (see the Collective strategy) or the internal coaching delivery (Performance Coaching).

01 1. The one idea

Interpretation before prescription. Most people are told what to do before anyone has read what their body is actually doing. Body Recode reads the body first - names the **state** it is operating in - and only then prescribes. Every piece of content, every ad, every funnel step bends back to that one idea.

The consumer promise: *"You are doing the work and getting nothing back. That is not a discipline problem. It is a body-state problem - and it is readable."*

02 2. Who we talk to

High-functioning adults whose bodies have stopped responding to effort - training hard, eating well, consistent, and getting nothing back. Four archetypes, **skewed toward the Depleted** end (bodies in protection/remediation, not the lean-and-optimising end).

The emotional truth we lead with (cold audience): *"You're training. You're eating well. You're consistent. And nothing is moving."* Name the feeling before any brand vocabulary. Never open cold content with doctrine words - lead with what they feel, then reveal the read underneath it.

03 3. The body-state doctrine (the spine of everything)

The body operates in one of three states, and each needs a different approach - the same program that works in one state makes things worse in another:

- **Depleted / Remediation** - protection mode; more training + less food makes it worse.
- **Transitioning / Optimisation** - responding, needs directed load.
- **Ready / Post-Optimisation** - can push.

Supporting assets that carry this: the **Body State Scorecard** (names state + pattern with a confidence tier), the **Fat Map**, the **Six Pillars**, and the canonical patterns (Stress-Stored / Insulin-Drift / Estrogen-Shift / Androgen-Decline). The arc verbs are **Decode -> Rewire -> Rebuild** (baked into the product names; never invent alternates).

04 4. The funnel (scorecard-first)

Everything routes to the **Body State Scorecard** first - it is the free, no-email-until-result diagnostic that turns a stranger into a named, segmented lead. The ladder from there:

STAGE	WHAT IT IS	PRICE
Body State Scorecard	Free 2-minute diagnostic. Names your state + pattern. The universal front door.	Free
14-Day Body Decode Challenge	Free 14-day challenge (Funnel B). Day-0 intake, in-portal experience, Day-14 reveal. Proof that the read works.	Free
The Blueprint	The paid next step after the Challenge - your personalised plan off the read.	\$97
Coaching / Membership	Ongoing Performance Coaching + membership - the delivery arm the funnel feeds.	Paid tiers

Two ad streams feed the top: **cold traffic -> Scorecard** (diagnosis-led), and **retargeting -> Challenge + Membership**. Local/warm can route straight to the Challenge. Promos always route to `/scorecard?intent=challenge`, never straight to a sales page.

Rule: the scorecard is the hub. Reach is upstream of conversion - before blaming a caption or CTA, find which gate the post failed at and fix the earliest broken step.

05 5. Channels & cadence

- **Instagram** @body_recode_ - **primary**. ~5x per week. Feed posts (authority, pattern, contrarian, coach, diagnostic), carousels for frameworks, and Stories. This is the demand engine.
- **Paid (Meta) - cold statics -> Scorecard**. Cold ad sets are statics only (no reels/video), optimised for the **Lead** event. Budget ramps deliberately (see the Meta budget plan) - never scale before the funnel converts.
- **Bio / links -> Scorecard**. bodyrecode.au/links is the IG-bio target; every path leads to the diagnostic.
- **Email** - post-scorecard nurture, Challenge sequence, Blueprint CTA, weekly check-ins.

Consumer content is state-first: reels, captions, ads, emails, landing pages, even error states all bend back to state-first language.

06 6. Content pillars (consumer)

Five recurring themes; every consumer post is one of these:

1. **Name the Feeling** - the stuck experience (doing everything, nothing moving). Cold-open empathy before doctrine.
 2. **Read Before Rx** - interpretation before prescription; why generic programs fail because they skip the read.
 3. **The Three States** - Depleted / Transitioning / Ready; why the same effort produces opposite results.
 4. **Proof & Pattern** - client trajectories, the named patterns, scorecard results, the Challenge in action.
 5. **Take the Scorecard** - the diagnostic CTA. Two minutes, no email until the result. Every one of these ends at the Scorecard.
-

07 7. Voice & design rules

- **Voice:** interpretation-led, calm authority, no hype. Contractions, varied rhythm, read-aloud test. Fat-loss-explicit framing. No "tips" content - always the read underneath.
 - **No em dashes** (house style) - hyphens or rewrites.
 - **Design language:** Pure White / Graphite / Signal Blue (#1B6DFC). Social assets 1080x1350 (4:5); reels 9:16; 96px safe margins. All photos of Kade in Body Recode graphics render **greyscale**, never colour.
 - Kade's public title in bylines: **"Sports Scientist"** (not "Exercise Scientist").
-

08 8. Messaging rules (do / don't)

Do: lead with the stuck feeling; name the state; make the Scorecard the destination; use proof (real trajectories, with consent); keep the read ahead of the prescription.

Don't: open cold with doctrine vocabulary; sell the Blueprint or coaching before the Scorecard; run reels/video in cold-paid ad sets; use colour photos of Kade in BR graphics; promise outcomes without the state read behind them; blur into the coach-licensing (Collective) or B2B audience - this brand talks to end-clients only.

09 9. What we measure

- **Scorecard completions / week** (true top of funnel).
 - **Scorecard -> Challenge enrolment rate.**
 - **Challenge -> Blueprint conversion.**
 - **Cost per Lead** (Meta, the only event the site fires) and blended CAC.
 - Reach -> save -> profile-visit -> scorecard, gate by gate, to find the earliest broken step.
-

10 10. How this brand relates to the others

- **Body Recode (this doc)** = consumer demand. Fills the top of the funnel and feeds coaching.

- **Performance Coaching** = the delivery arm the funnel feeds (not separately marketed).
 - **The Collective** = the B2B licensing engine ("Powered by Body Recode"). Different audience (coaches), different channel (LinkedIn). Never mixed into consumer content.
 - **Personal brand** (@kade_dunstone_) = Kade's first-person voice; sends warm audience toward Body Recode but keeps its own pillars.
-

Consolidated 2026-07-19. Numbers reflect the locked funnel anchors (Scorecard + Challenge free, Blueprint \$97); coaching/membership tiers per the current money model.
