

// capped ten founding partners on the powered platform

Body Recode • Founding Ten

00_FOUNDING_TEN — The direction

This folder holds the current strategic core of Studio of Ten: the **Founding Ten powered-platform program**. Read this first.

Last updated: 2026-06-30

01 What SOT is now

Studio of Ten has pulled back from leading with bespoke “we’ll build you anything” studio work (call that **Lane A**). The front door is now the **powered platform (Lane B)**:

A practitioner gets the **Body Recode coaching engine + website + onboarding**, white-labelled to their brand and their modality, delivered as a productised package. Capped at **ten founding partners**.

Lane A still exists as bespoke overflow, but it is no longer the pitch. The first ten seats prove the powered model; evergreen comes after.

02 Why “ten”

The cap is the offer. Ten lets each founding partner get real attention during build + launch, keeps the platform multi-tenant-but-curated, and creates honest scarcity for the founding pricing. After the ten are live and stable, the model opens up (B: method-injection, evergreen seats).

03 The two layers we sell

- **Layer 1 — the interpretation engine.** Diagnosis: scorecard → reading → state. Runs the BR doctrine now (decision **A**); partners inject their own method later (**B**).
- **Layer 2 — the coaching application.** Prescription: programs, nutrition, check-ins, portal. Everything coach-gated. The scorecard lead magnet sits at the top of Layer 2.

04 What's in this folder

FILE / FOLDER	WHAT'S INSIDE
<code>OFFER_ARCHITECTURE.md</code>	The founding-partner offer: the ladder (Powered Partner → Launch → Studio), three-layer pricing (setup + subscription + per-seat), economics. Canonical SOT copy.
<code>POWERED_PLATFORM_BUILD_PLAN.md</code>	The Layer 1 / Layer 2 build plan — what's needed to have both ready to sell, multi-tenancy readiness.
<code>modalities/</code>	The modality packs. Each modality (yoga now, Pilates next) gets a doctrine + scope. See below.
<code>onboarding/</code>	The founding-partner onboarding flow: IP extraction → build → launch.

modalities/

FILE	WHAT'S INSIDE
<code>YOGA_MODALITY_SCOPE.md</code>	Scope of the yoga modality build — what reaches parity with strength, what's deferred.
<code>YOGA_DOCTRINE_v1.md</code> / <code>.docx</code>	The yoga generation doctrine: intensity ceilings by state, contraindication filtering, practice arc, sequencing rules.

05 Pointers (not in this folder)

- **The code** — the yoga modality is built in the `body-recode-mvp` repo on the `feature/yoga-modality` branch (pushed to GitHub). Not in Dropbox by design; it's the app codebase.
- **The website** — the repositioned SOT site is `../02_WEBSITE/landing-v2-draft.html` (founding-ten spine + "why a scorecard" section).
- **The Melisa origin** — the offer was born from the Melisa partnership. Those artifacts live in `01_BODY_RECODE/09_PARTNERSHIPS/` (`Founding_Partner_Offer_Architecture.md` is the original; the copy here is canonical for SOT). Also the `Melisa_Partnership_Proposal.pdf`.

06 Note on the rest of this folder

`00_OVERVIEW/` (studio-overview, service-menu, ideal-client-profile) still describes the **older bespoke positioning**. It has not been rewritten to the founding-ten direction yet — treat this README as the current truth where they conflict. The operational folders (`01_BRAND` through `09_INTERNAL_TOOLS`) remain valid supporting infrastructure.
